THE DISTRIBUTOR PROBLEM: MEDIUM VOLTAGE PROJECTS CAN'T WAIT!

Medium voltage projects move fast, but long manufacturer lead times continue to slow jobs down and create scheduling risk. Build-to-order cable requirements can also tie up capital and limit flexibility when project scope changes. Contractors are looking for faster turnaround and dependable availability they can rely on, while distributors need medium voltage cable they can sell with confidence and deliver quickly to meet real world demand.

That's where **Classic Wire & Cable's PowerGuard[®] MV EPR** stands out among the rest:

Exactly What the Market Demands

- 5–35 kV MV EPR cable
- UL Listed at UL Type MV-105
- Manufactured to industry accepted ICEA and UL standards
- Stocked domestically for fast shipment
- No compromise on performance or approvals
- Same standards. Faster supply.

Built for Easier Installation

- Compact construction for smaller overall diameters
- Controlled-adhesion insulation shield for clean stripping
- Copper tape shield for dependable grounding
- Water-blocked conductor with better long-term performance in the presence of moisture
- Consistent jacket performance in field conditions

Same Specs. Better Availability.

- Meets UL and ICEA standards with no change to approved requirements
- Eliminates multi week manufacturing lead times
- Reliable second source for medium voltage supply
- Access to experienced engineering support and MV expertise
- Value added services plus compatibility with major splice and termination brands

Designed for Inventory & Turns

- Domestic inventory availability
- Faster order fulfillment
- Reduced expediting and jobsite delays
- Predictable project scheduling
- Strong alternative to long-lead manufacturers
- Sell what you can deliver.
